Aesthetic Institute & Laser Center
& Emerging Technologies Medical Clinic

The Largest Dedicated Cosmetic Laser Center in the World

Welcome

to Gateway Aesthetic
The largest dedicated cosmetic laser center in the world

From skin rejuvenation to laser eyelid surgery, from acne scar treatment to SmartLipo® procedures—we do it all.

Our team has over 40 years of combined experience, so you can rest assured that your treatment will be safe and effective, and that your visit will be comfortable and relaxing.

Whether you're looking for a simple light facial or a complete laser resurfacing, our experienced staff of skilled providers can help. The Gateway Aesthetic Institute is much more than a medical spa; we offer comprehensive, personalized treatment from qualified medical professionals using state-of-the-art lasers.

Give us a call or visit our website today to get started with one of our countless customized treatment options. You'll soon be on your way to achieving your most beautiful self.

Dr. Mark B. Taylor

Dr. Mark B. Taylor is a world-renowned dermatologist and cosmetic laser surgeon who has been in practice for over 30 years. He founded the Gateway Aesthetic Institute and Laser Center in 1997. Since the origination of laser treatments for skin, Dr. Taylor has been a leader in the field of cosmetic laser surgery, pioneering and teaching many new laser techniques to over 5,000 doctors world-wide.

To see our current list of board-certified dermatologists, plastic surgeons, physician assistants, nurses, and aestheticians, visit our website at GatewayLaserCenter.com.

Why come to Gateway Aesthetic?

You'll be treated by the best.

The Gateway Aesthetic Institute is the largest dedicated cosmetic laser center in the world. All of our dedicated providers are experts in their field and will ensure that your treatment is safe and effective.

You'll get a customized treatment.

Our selection of over 70 state-of-the-art lasers and energy devices, coupled with our unmatched expertise, ensures that you will receive the perfect treatment customized and tailored just for you.

You'll be comfortable.

The new Gateway Aesthetic clinic provides a welcoming, luxurious, and private atmosphere. Our friendly, caring staff will walk you through every step of the way, making sure your experience is as relaxing and painless as possible.

You'll get the results you want.

We have helped well over 100,000 clients achieve their very own amazing results. Now it's your turn! Visit GatewayLaserCenter.com or call **801-595-1600** to begin your journey to your most confident, beautiful self.

Our Most Popular Services

Face & Neck

Botox®, Dysport®, Jeuveau®, Daxi®, and Xeomin®

The most popular patient treatments in the aesthetic industry today are muscle relaxers— Botox®, Dysport®, Jeuveau®, Daxi®, and Xeomin®. These products give you a more friendly, youthful and less-stressed appearance by relaxing the facial and neck muscles that cause wrinkles and fine lines. Areas typically treated include frown and forehead lines, crow's feet, neck lines, and pucker lines on the lips. Not only are these treatments some of our most popular, but patients are also consistently satisfied with the results!

Soft Tissue Fillers

Fillers are also among our most popular treatments, offering patients instant, long-term results. At Gateway Aesthetic, we carefully choose the safest and longest lasting fillers to enhance facial volume, erase wrinkles and folds, and provide youthfulness and harmony to your face. Common areas where fillers can be used to enhance appearance include lips, under the eyes, temples, forehead, eyebrows, cheeks, chin, and laugh lines.

Spot Removal

Spot removal on the face is performed using lasers, IPL (intense pulsed light), or minor surgery. Common spots include enlarged oil glands (sebaceous hyperplasia), freckles, keratoses, enlarged pores, venous lakes, red and blue veins, skin tags, moles, syringomas, cysts, and much more.

Laser, IPL, & Picosecond Laser Facials (PicoFacials®)

Lasers and IPL (intense pulsed light) devices are used to remove red and brown spots from the face, arms, hands, neck, chest, and other selected areas. With over 60 IPL and laser devices, Gateway Aesthetic has the latest technology to treat unwanted spots and enhance the appearance of your skin.

Skin Tightening Procedures

Lasers, radiofrequency devices, and ultrasound devices are used to tighten the skin. At Gateway Aesthetic, we have reviewed all available devices for skin tightening and have chosen those that offer the best results, with the least discomfort, and at the lowest patient cost. Skin tightening procedures are often combined with other same-day procedures to maximize the enhancement to your skin.

Treatments for Double Chin and Areas of Localized Fat

SmartLipo®, CoolSculpting®, Thermi®, and liposuction are highly effective procedures for treating localized fat under the chin. Kybella® is an FDA-approved injectable fat-dissolving product that can also be used to treat a double chin and other small areas of fat.

Skin Resurfacing with Lasers and Radiofrequency Devices

Laser resurfacing is the most effective treatment to remove wrinkles, scars, and precancerous skin lesions, and helping your skin look 20+ years younger. Light, medium, and deep laser resurfacing options are available to our patients to customize the perfect treatment for their needs and lifestyle. Our doctors have over 25 years of experience performing laser resurfacing. Treatment can be performed in a single session or with milder treatments over multiple sessions.

Baggy Eyelids

Treatment of baggy eyelids is a specialty at Gateway Aesthetic. Over the past 25 years, we have treated over 3,000 highly satisfied patients using laser surgery, laser resurfacing, and other eyelid tightening procedures that improve the tired appearance of wrinkled, baggy, and loose eyelid skin.

Spider Veins and Facial Redness

Lasers and IPL (intense pulsed light) treatment of facial redness and spider veins is a common and highly successful procedure. Treatment of the entire face takes just a few minutes. Multiple treatments are often recommended to achieve your desired results.

Acne Scars

Our owner, Dr. Mark Taylor, invented the most effective method for treating acne scars that uses a specially designed surgical tool called the Taylor Liberator®. Patients have come from all over the world to have their acne scars treated at Gateway Aesthetic. During your consultation, we will create a treatment plan to improve the appearance of as many scars as possible in a single session.

Face Lifting and Threading Procedures

Traditional and minimal-incision face lifts are performed by our board-certified plastic surgeon. Simpler nonsurgical lifts can be performed with absorbable sutures that offer minimal or no down time. These dissolvable sutures add lift and youthful volume to the face. Another option, a nasolabial fold lift, is performed by excising excess skin from around the laugh lines—often a good option for patients with thin, loose skin on their lower face.

Dark Under-Eye Circles

Darkening under the eyes is caused by hollow tear troughs, eye bags, veins, wrinkles, and increased skin pigment around the lower eyelids. At Gateway Aesthetic, we offer customized treatments to improve or eliminate these shadows and dark circles.

Treatment of Sun Damaged Lips

The sun can cause severe damage to the lips, often resulting in rough white spots that may be an early sign of impending skin cancer. Lighter skin types are especially susceptible to sun damage and cancer. Laser treatment of sun damaged lips both removes the precancerous spots and improves their appearance.

Microdermabrasion, Skin Planing, and Silk Peels

Light exfoliations of the epidermis using microdermabrasion, dermaplaning, and silk peels (microdermabrasion with rejuvenating solutions) provide freshness and radiance to the skin for a youthful glow and smoother application of skin care products and cosmetics. These treatments also promote better circulation, stimulate new collagen production, and clean pores to help prevent acne.

Brow Lifting

Gateway Aesthetic offers multiple treatment options to lift sagging brows, including plastic surgery, absorbable suture suspension, skin tightening (to lift the brow), and fillers to augment and elevate the brow. Our team of experts will help select the perfect option for you!

Treatment of Abnormal Skin Pigment

Uneven pigment in the skin can be caused by many conditions, including age spots, melasma (pregnancy mask), post-inflammatory hyperpigmentation (PIH), and darkly pigmented scars. Our new picosecond laser facials allow us to treat unwanted pigmented spots with greater improvement and fewer risks over older technologies. We have many other options for your skin pigment. With our board-certified dermatologists, extensive experience, and a vast array of modern laser technology, we can help you understand and solve your skin pigment problems.

Body

Liposuction Body Sculpting Procedures

Gateway Aesthetic offers advanced surgical solutions to help you achieve your ideal body shape and figure. Liposuction, Vaser®, BodyJet®, and SmartLipo® are highly effective surgical procedures used for body contouring with extremely high patient satisfaction.

Non-surgical Body Shaping

Emsculpt NEO® with radiofrequency (RF) and high frequency electromagnetic muscle stimulation (HI-FEM) reduces fat by 30% and tightens muscle by 25% in four easy 30-minute treatments. CoolSculpting® (fat freezing), UltraShape® (ultrasound melting), Fotona TightSculpting® (laser), and Vanquish ME® (RF) are among the many options available at Gateway to help you achieve your ideal shape.

Treatment of Hyperhidrosis (Excess or Unwanted Sweat)

If you are looking to treat excessive underarm sweating, the FDA-approved Miradry® is the gold standard. The treatment uses microwave energy to permanently inactivate sweat glands. Botox®, Dysport®, Jeuveau®, Daxi®, and Xeomin® can also stop sweating in target areas (including sweaty palms) for up to 6 months.

Removal of Unsightly Growths

Skin growths on the body include seborrheic keratoses, tags, cherry angiomas, moles, birthmarks, and many other types of lesions. These can all be efficiently and effectively removed with our lasers or minor surgical excision.

Hands and Arms

Hand Treatments for a More Youthful Appearance

As hands age, they typically become boney, spotted and wrinkled. Combined therapies treat prominent veins, restore volume with fillers, and remove spots with lasers or IPL (intense pulsed light). With today's technology, it is possible to greatly restore the youthful appearance of the hands.

Thighs, Legs, and Feet

Removal of Varicose and Spider Veins

Spider and varicose veins on the legs can be successfully treated with sclerotherapy (injections) or lasers. Treated areas typically include thighs, legs, and feet. This is a quick, easy, and successful procedure with little to no downtime.

Cellulite Treatments

Cellulite may also be treated with lasers (Cynosure CelluLaze) or subcision by releasing the dimples with the Taylor Liberator®.

QWO® is a new injectable treatment for cellulite dimples using a collagenase to dissolve cellulite bands. This treatment is often combined with Z-Wave pulsed acoustic wave treatment, another effective treatment for cellulite.

Other methods of treatment that offer significant temporary improvement to the appearance of dimples, fibrous band, and loose skin include VelaShape II® (near infrared light, radiofrequency and massage) and MedSculpt® (massage and ultrasound).

Laser Treatment of Toenail Fungus (Onychomycosis)

Nail fungus can be treated with a combination of laser and topical products. Gateway Aesthetic has invented new ways to treat onychomycosis that are safe, quick, and effective.

Hair Restoration

NeoGraft® Hair Transplant

With NeoGraft®, individual healthy hairs from the back of the scalp can be removed and transplanted into areas where the hair is thinning, balding, or receding. This highly successful treatment can be performed in a single session and leaves no unsightly scars. Eyebrows can also be restored permanently with NeoGraft hair transplants.

Hair Restoration Treatments

Hair restoration treatments stimulate growth of both transplanted and original hair. In addition to NeoGraft® hair transplants, we offer the following treatments for thinning hair:

- **Nutrafol hair vitamins** are once-daily vitamins that have been proven effective in clinical studies.
- **Theradome red-light therapy** has been confirmed in clinical studies to stimulate hair growth using an LED hair dome with numerous red diode lights, used at least 3 times a week for 20 minutes per session. The Theradome is available from Apothica, our clinic store; call **801-746-7444** to get yours shipped to you.
- **Rogaine®** can be purchased at retail stores like Costco and, if used regularly, will stimulate hair growth. Rogaine® must be used continually to maintain hair fullness.
- **Minoxidil and Finasteride** are once-daily prescriptions that can be prescribed by our doctors or physician's assistants. These highly effective medications help maintain the fullness of native hair and reduce balding.
- **Platelet Rich Plasma (PRP)** is used to jump start and maintain growth of both transplanted and native hair. It is recommended to have treatments once monthly for 3 months, and then one treatment every 6 to 12 months for maintenance.
- **Umbilical Cord Mesenchymal Stem Cell Tissue Treatment (MSCT)**. Ask our providers for more information regarding MSCT.
- **Laser hair stimulation** heats and stimulates the scalp with a long-pulse erbium laser and has shown promising results in some early clinical studies. These laser treatments can be done on the same day as PRP injections or separately.

Medical Hair Loss

Medical hair loss has many causes. Our board-certified dermatologists are well-trained and experienced in the diagnosis and treatment of the many types of medical hair loss. To schedule a consultation, contact us today at **801-595-1600**.

Hair Removal

Laser Hair Removal

Removal of unwanted hair is perhaps the most popular, successful, and affordable laser treatment available today. Multiple sessions can permanently remove unwanted hair on virtually any part of the body. At Gateway Aesthetic, we have numerous lasers to treat unwanted hair, and we will use the best option for your skin and hair color.

Female and Male Rejuvenation*

Vaginal Tightening with Laser or Radiofrequency

Vaginal tightening is a popular treatment that uses laser and/or radiofrequency energy (Fotona G-Runner™ and THERMIVA®) to heat, shrink and tighten the vaginal mucosa. The treatment is not only helpful to women with stress incontinence (urinating when exercising, coughing or sneezing), but it also increases pelvic support and sensitivity during sexual intercourse. It is a simple, quick, and comfortable procedure performed with little to no downtime.

Emsella™

Emsella™ is a non-invasive, FDA-cleared, therapeutic HIFEM (high-frequency electromagnetic muscle stimulation) treatment chair used to tighten the pelvic floor muscles of both females and males to treat stress urinary incontinence and also to enhance the health and function of the female and male genitourinary organs. A series of treatments is performed fully clothed with no down time.

PRP Sexual Stimulation Shots for Women

PRP (platelet rich plasma) from a patient's blood is injected into the "G-spot" and other areas around the clitoris to increase sensitivity during sexual intercourse. This treatment may be combined on the same day with a vaginal tightening procedure.

PRP Sexual Stimulation Shots for Men

PRP (platelet rich plasma) is injected into the penile shaft to promote increased size, firmness, and sensitivity during sexual intercourse. Z-Wave (acoustic wave therapy) laser or a penis pump may further enhance the results.

Umbilical Cord Mesenchymal Stem Cell Tissue Treatment (MSCT). Ask our providers for more information regarding MSCT.

Erectile Dysfunction

Treatment for ED (erectile dysfunction) using acoustic wave therapy (Gains-Wave) is available. We specialize in helping both partners with the latest available technology.

***Note:** We recommend that females have a current gynecological exam with a gynecologist and that males have a current examination with a urologist before undergoing female or male rejuvenation treatment.

Dermatology

Dermatology Services

Gateway Aesthetic employs multiple board-certified dermatologists who understand skin diseases, skin cancer, and surgery. We can diagnose and treat any of your skin conditions or, if necessary, refer you for specialized care.

Skin Surgery and Mole Removal

Both dermatologic and plastic surgeons are on staff at the Gateway Aesthetic Institute. We perform skin surgeries to remove skin cancers, tumors, scars, lipomas, and moles. Surgically removed moles are sent for pathologic examination to be certain there are no abnormal cells. For other suspicious lesions and skin diseases, we take a biopsy of the skin to aid in diagnosis and treatment.

Treatment on Dark Skin

Many of our patients with naturally dark skin need help with treatment for acne, skin diseases, abnormal pigmented spots, or benign skin lesions. We specialize in treating dark skin safely, removing the unwanted spots, and leaving the surrounding skin as normal as possible. We also diagnose and treat conditions unique to skin of color.

Specialty Treatments

Umbilical Cord Mesenchymal Stem Cell Tissue Treatment (MSCT)

Please consult with one of our providers for information on MSCT treatment.

Chemical Peels

Chemical peels can improve skin pigment, texture, wrinkles and scars. We offer a full line of peels from mild to deep, depending on the skin condition and desired results. Ask one of our experts for details regarding the benefits of each peel type and which would be best for you.

Laser Treatment of Birthmarks

Birthmarks come in many colors and may be either flat or raised. We have over 30 years of experience removing birthmarks with lasers, surgery, and other technologies. We also invented a technique using a short-pulse, high energy Nd:YAG laser that is extremely successful in treating deeper red and purple birthmarks.

Treatment of Scars and Keloids

Gateway Aesthetic is a worldwide referral center for the treatment of scars and keloids. We can greatly improve the appearance of scars and keloids with a combination of therapies including laser, IPL (intense pulsed light) devices, injections, and topical treatments.

Laser and Medical Treatment of Hemangiomas

Hemangiomas are collections of unwanted blood vessels in the skin that often cause a red or purple bulge. The most common type is an infantile hemangioma or strawberry mark that appears shortly after birth and may enlarge over time. These lesions are best treated sooner rather than later to lessen tissue destruction and a prolonged unsightly appearance of the skin.

Low Level LED Light Treatments

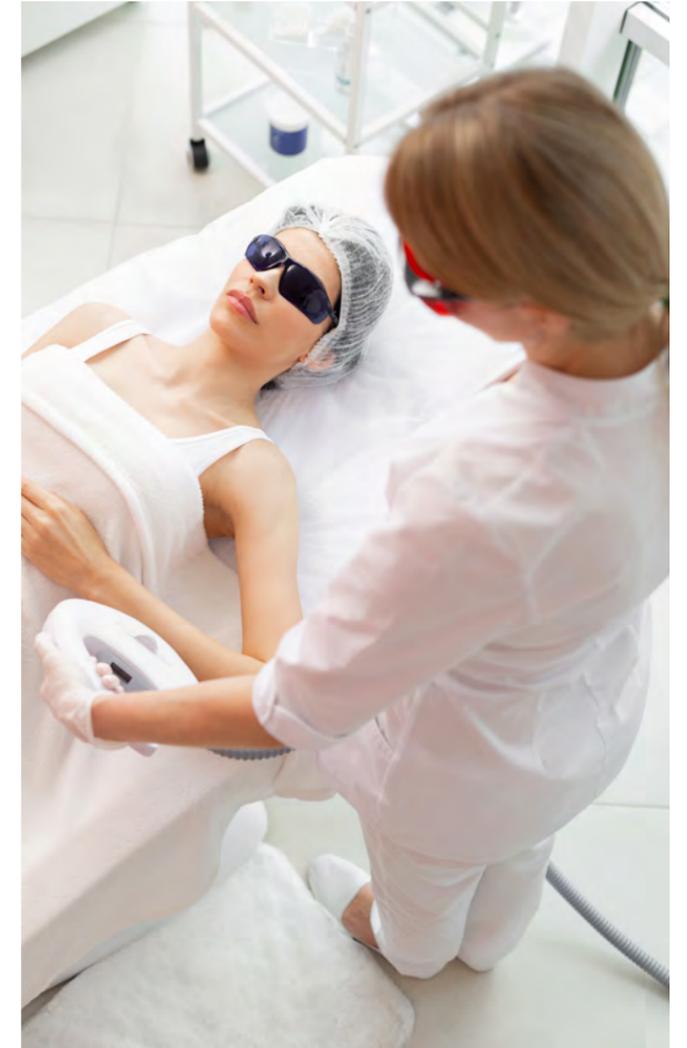

LED light treatments are used for skin healing, and for treatment of precancerous lesions, acne, and rosacea. They also stimulate fat shrinkage and the production of new collagen and blood vessels in the skin. Our skincare store Apothica sells handheld LED lights ideal for home use (Omnilux New-U to improve circulation and collagen growth and the Omnilux Clear-U to improve inflammatory acne and treat skin infections).

Photodynamic Therapy

LED lights can be combined with photosensitizing topical products for skin rejuvenation to treat acne, sun damage, and other skin diseases and cosmetic conditions.

Combined Treatments

Many of our cosmetic procedures can be combined and performed on the same day. For example, patients will often combine eyelid surgery with laser resurfacing or skin tightening. Combining procedures is not only synergistic, improving the overall outcome, but it reduces the recovery time that would be required when individual aesthetic procedures are performed separately. **Ask our providers which procedures can safely be performed on the same day.**

GATEWAY

Emerging Technologies Medical Clinic

At the Gateway Emerging Technologies Medical Clinic (located in suite 200, on the same floor as Gateway Aesthetic), we specialize in both wellness medicine and new research technologies.

Health and wellness treatments at the Clinic include:

Hormone Balancing

- Balancing natural hormones for women using bioidentical hormone therapy, nutrition, and herbal medicine to improve energy, mood, weight management, and sexual function. It also helps with perimenopausal and menopausal symptoms, fertility, and menstrual problems
- Optimizing testosterone and other hormone levels for men to enhance energy, libido, brain function, and muscle mass
- Enhancing thyroid and adrenal (stress hormone) function with comprehensive laboratory hormone analysis

IV Vitamin Therapy

- Vitamin and mineral formulations customized to fit the patient's nutritional needs
- B12 and "LipoBlast" shots (for weight loss and insulin resistance)
- IV ozone therapy
- Myers' Cocktail IVs
- Immune-enhancing IVs
- Anti-aging IVs

Women's Health/Gynecology

- Women's annual exams (pelvic exams, pap smears) in a gentle, non-intimidating environment
- Natural solutions to PMS, PCOS, endometriosis, infertility, and other women's health concerns

Environmental Medicine

- Comprehensive laboratory testing for environmental toxins, Lyme disease, and mold biotoxins
- Enhancing patient's detoxification using IV therapy, nutrition, herbs, supplements, and lifestyle modifications

Medically Supervised Weight Loss

- Customized nutrition and exercise plans catered to each patient's metabolic needs

Nutritional Counseling

- Help with maximizing nutrition through various eating plans, including gluten free, dairy free, paleo, autoimmune paleo (AIP), low FODMAPs, vegan, vegetarian, low carbohydrate, and ketogenic
- Laboratory analysis of nutritional status and possible food allergies with corresponding eating plans

Mood Support

- Natural relief for depression, anxiety, and "brain fog"
- An integrative approach to mental health that includes genetic and nutritional testing, along with the use of both pharmaceutical and natural treatments

Physical Medicine

- Injury prevention, rehabilitation, and pain management using manual therapy, craniosacral therapy, postural analysis, and prolozone injection therapy

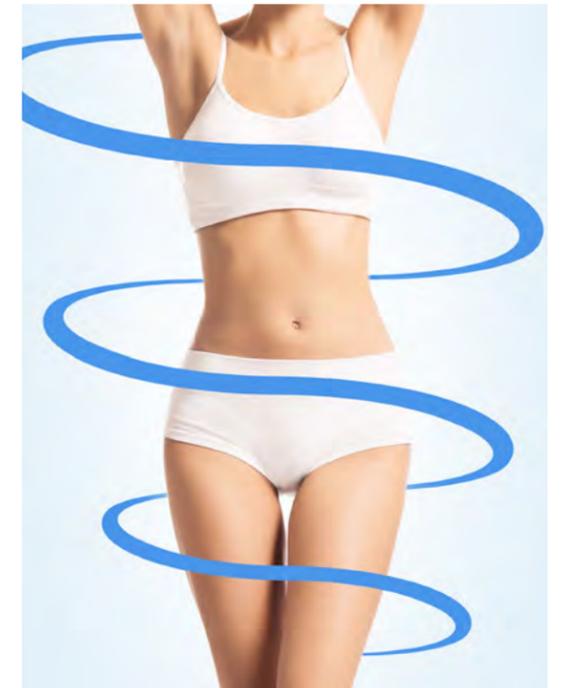

Gut Health

- Integrative treatment for IBS (irritable bowel syndrome), heartburn (reflux), SIBO (small intestinal bacterial overgrowth), IBD (inflammatory bowel disease, candidiasis and intestinal parasites)
- Comprehensive testing of stools and breath to diagnose the root cause of intestinal distress
- Gut healing through nutrition, microbiome balancing, and high-quality herbs and nutritional supplements

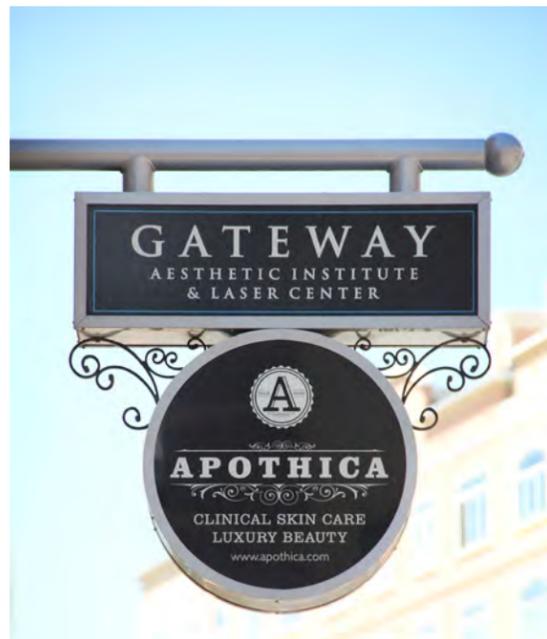

Immune Wellness

- Improving immune function via organic highly-absorbable nutrients and ozone therapy
- Holistic treatment of immune system distress from the common cold and allergies to autoimmune diseases and Epstein-Barr.

And more! For more information about our current providers, visit StayWellUtah.com, GatewayLaserCenter.com, or call our Emerging Technologies Medical Clinic at **801-456-2326**.

APOTHICA

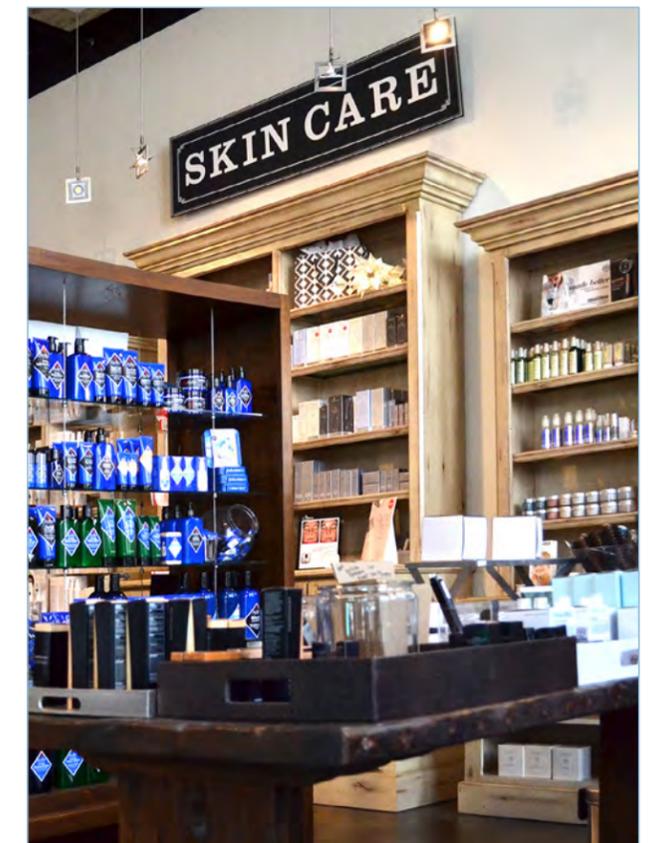

Apothica is our specialty retail store where we sell tested and approved beauty and wellness products to our patients and customers. With thousands of products on the market, it is difficult for the average consumer to know what will work best to maintain the health and beauty of their skin. Recommendations are available from our board-certified dermatologists and the Apothica staff.

Rotating products among our high quality, clinically tested beauty brands in Apothica will maximize the benefits of your skin care regimen and avoid a condition called tachyphylaxis, where skin becomes resistant to the continued use of the same products. Our consultants have many years of experience and will help you select a proper skin care regimen and rotation personalized to your skin.

Apothica's product categories include: (1) antioxidants (vitamins C and E), (2) retinoids (vitamin A products), (3) growth hormones, (4) polypeptides, (5) alpha and beta hydroxy acids (fruit acids), (6) pigment bleaching products, (7) ceramides, lipids and hyaluronic acids (moisturizing and hydrating), and (8) sun protective products (sun block) and other specialty products.

Apothica also offers natural cosmetics and hair care products, as well as an extensive line of home use beauty devices.

We are located at **171 South Rio Grande Street, Suite B, Salt Lake City, Utah 84101**. Give us a call at **801-746-7444** for more information!
